

Final Project (25% of final grade)

Friday December 21 by 11:59pm

Your submission will have two components: the project itself and a write up

The submission for the project itself will be different for each person and should follow what was agreed upon in the individual meetings held during the last week of November. If you have any questions or want to change something, please email Johanna.

The written report should be 5-8 pages in length and should cover the following

1. A description of the big picture idea for the project
2. A summary of relevant past work
3. A description of the steps you undertook to complete the project (including both data curation and technical/programming aspects) – this should be in sufficient detail (including the settings you used when you ran various algorithms) that someone could replicate your work
4. A summary of how you evaluated your work (quantitatively or qualitatively) and what you found
