

Presentation for Final Project (15% of final grade)

Tuesday December 11 or 18

Prepare an 8–12-minute presentation on your project

1. You should have slides (post them on Github or email them to Johanna)
2. You should give the audience the big picture of the project
3. You should give some audio examples of the audio that you are analyzing that illustrate what your project is trying to address
4. You can talk about your (preliminary) findings qualitatively (rather than quantitatively)
